EDUCATION

Fudan University

Majoring in Computer Science and Technology

Shanghai, China

Sept.2022 - Expected Jun.2026

- **Cumulative GPA:** 3.67/4.00
- **Honors and Awards:** Third Prize Scholarship (2023-2024 & 2022-2023); Fudan University Outstanding Student Scholarship

University of California, Davis

Davis, CA, US

Exchange Program, **Cumulative GPA:** 4.0/4.0

Sept.2024 - Dec.2024

TECHNICAL SKILLS

Programming Languages: C / C++ / Python / R / Bash

Front-end Frameworks: Vue(HTML, JavaScript/TypeScript, CSS)

Database: PostgreSQL

Operating Systems: Project development based on Linux

Hardware Design: Designing hardware logic in Vivado and conducting simulation verification

RESEARCH AND PROJECT EXPERIENCE

Fudan University Natural Language Processing Group | Research Intern

Jun. 2024 - Present

- Engineered NLP data pipelines by implementing text normalization, entity recognition, and semantic filtering techniques, to support model training for sentiment analysis and text summarization tasks.
- Architected a safety alignment module using PyTorch, implementing content filtering (keyword blacklists) and rule-guided reward scoring based on safety criteria to enhance the safe text generation capabilities of language models..
- Established a multidimensional evaluation framework combining automated rule-based scoring with human supervision to assess model outputs across safety, relevance, and instruction-following capabilities.

THINKDRIVE Autonomous Driving and Digital Twin System

Sept. 2024 - Present

University Student Innovation & Entrepreneurship Development Program | Web Front-end Developer

- Built core modules of digital twin web interface using modern JavaScript frameworks, implementing real-time vehicle status visualization and interactive controls.
- Optimized front-end architecture with modular design, enhancing code maintainability across 20+ reusable UI elements.
- Contributed to simulation platform development by creating configurable training scenario templates.

Shanghai Library Open Data Competition | Excellence & Popularity Award Winner

Jun. 2024 - Aug. 2024

Web Front-end Developer, Team Leader

- Developed award-winning cultural heritage platform (<https://www.sharch.city>) with 3D building visualization and AI-powered historical Q&A system.
- Implemented responsive frontend using CSS grid layouts and dynamic data rendering (15+ interactive timeline modules).
- Built RAG pipeline integrating Shanghai Open Data APIs and custom vector database, improving semantic search relevance.

PROFESSIONAL EXPERIENCE

Transwarp | Software Testing & Development Intern

Shanghai, China | Dec. 2024 – Mar. 2025

- Executed functional and performance testing for ArgoDB distributed database across Linux/Windows environments.
- Automated test case execution using Python scripts and documented reproducible defect scenarios with JIRA issue tracking.
- Built monitoring dashboard integrating Prometheus metrics, enabling faster anomaly detection.

LEADERSHIP AND EXTRACURRICULAR EXPERIENCE

Class President of the Computer Science Undergraduates Class of 2022

Sept. 2023 - Present

- Assisted the counselor in managing a class of 120 students, coordinating events such as spring outings, choir competitions, and military training video production.
- Streamlined class operations, strengthening teacher-student connections, and fostering a cohesive environment.

Volunteer Services:

FISS (Fudan University Summer International Program) Buddy

Jul. 2024 – Aug. 2024

- Assisted exchange students by coordinating logistics, providing cultural guidance, and ensuring a welcoming environment.

Ceramic Art Association "Sunshine Home" Practice Activity

Mar. 2023

- Guided individuals with intellectual disabilities in ceramic-making, fostering creativity, patience, and inclusivity.
